Aggregate Overview Footnotes

¹ Net Investment is the total value of contributions and withdrawals (excluding unsupervised assets) made by the client since the inception date of the account. This includes Misc. Expenses and Accrued Income received from the custodian.

² Time Weighted Rate of Return (TWRR) is calculated net of all fees. Time Weighted Rate of Return (TWRR) is used to compare your portfolio returns versus benchmark indices (such as S&P 500).

³ A benchmark is an unmanaged index, and its performance does not include any advisory fees, transaction costs or other charges that may be incurred in connection with your investments and/or managed accounts listed. Any benchmark whose return is shown for comparison purposes may include different holdings, a different number of holdings, and a different degree of investment in individual securities, industries or economic sectors than the investments and/or investment accounts to which it is compared. Investors cannot invest directly into a benchmark or index. All portfolio returns for all periods are expressed in USD. All benchmark(s) returns reflect the same currency as the portfolio returns presented. Yearly performance values (e.g. Trailing 3 Years) shown are from the specified period up to Jul 31, 2024. The benchmark(s) for the account(s) ****4236, ****3656, ****1320, ****8308, ****8589, ****4116 are customized benchmarks that segments specific blended benchmarks into different time periods (as noted herein) to reflect the corresponding changes in your portfolio's investment strategy over time. The intent of these segmented benchmarks is to seek to provide a more accurate comparison to which returns can be evaluated effectively.

⁴ Displays the returns for the period from the beginning of the current quarter to the most recent market date (As of Date).

⁵ Displays the returns for the period from the beginning of the current year to the most recent market date (As of Date).

⁶ Trailing 1 Year is Jul 31, 2023 to Jul 31, 2024

⁷ Trailing 3 Year is Jul 31, 2021 to Jul 31, 2024, annualized

⁸ Trailing 5 Year is Jul 31, 2019 to Jul 31, 2024, annualized

A daily rebalance option is also offered however may not be available in all cases due to data limitations from providers.

¹⁶ Returns for greater than one year are annualized.

For accounts holding mutual funds, ENV is currently using month end dividend rates for daily accrual funds. On the last day of the month, the dividend rate is multiplied by the number of shares held in an account. The dollar amount will be applied to the account performance. As a result of not applying a daily accrual, your performance could be higher or lower if the shares were not held for the entire month. This estimated amount is reversed out on the 1st day of the next month when the actual custodian dollar amount is received. This amount received from the custodian will be applied to your account performance. This does not affect your actual dividend payment.

Activity and Performance Summary Footnotes

¹ Net Investment is the total value of contributions and withdrawals (excluding unsupervised assets) made by the client since the inception date of the account. This includes Misc. Expenses and Accrued Income received from the custodian.

² "Beginning Value": the account's value at the beginning of each period; "Contributions": the value of deposits from the client into the account for each period; "Withdrawals": withdrawals from the account for each period; "Capital Appreciation": all realized and unrealized changes in market value during the period; "Dividends": the amount of dividends received from stocks or mutual funds for each period; "Interest": the amount of interest received for each period; "Advisory Fees": the amount of advisory fees charged to the account for each period. Income Received is computed from the dividends and interests of the supervised assets only.

³ These figures compare the Time Weighted Rate of Return (TWRR) of your account with a benchmark index. "Mgr Bchmk" refers to a blend composed of 85% MSCI All Country World Index World(USD)(TRN), 15% Bloomberg U.S. Aggregate Bond TR (7/30/2008 - 1/1/2018), 54% Russell 1000 TR, 21% BNYM Dev Mkt Classic ADR Ind, 9% Bloomberg Intermediate U.S. Government/Credit TR, 6% BNYM Emg Mkt Classic ADR Ind, 5% S&P Small Cap 600 TR, 3% Bloomberg Gbl Agg Ex USD TR Hdg USD, 2% BOFAML 3-Month U.S. T-Bill TR (1/2/2018 to date). "Mgr Bchmk" is a customized benchmark that segments specific blended benchmarks into different time periods (as noted herein) to reflect the corresponding changes in your portfolio's investment strategy over time. The intent of these segmented benchmarks is to seek to provide a more accurate comparison to which returns can be evaluated effectively. A benchmark is an unmanaged index, and its performance does not include any advisory fees, transaction costs or other charges that may be incurred in connection with your investments and/or managed accounts listed. Any benchmark whose return is shown for comparison purposes may include different holdings, a different number of holdings, and a different degree of investment in individual securities, industries or economic sectors than the investments and/or investment accounts to which it is compared. Investors cannot invest directly into a benchmark or index. All portfolio returns for all periods are expressed in USD. All benchmark(s) returns reflect the same currency as the portfolio returns presented. Blended benchmarks are defaulted to rebalance monthly which means that Envestnet will asset weigh the benchmark component returns on a monthly basis using the beginning of the month weights. A daily rebalance option is also offered however may not be available in all cases due to data limitations from providers.

⁴ Time Weighted Rate of Return (TWRR) is calculated net of all fees. Time Weighted Rate of Return (TWRR) is used to compare your portfolio returns versus benchmark indices (such as S&P 500).

⁵ Returns for greater than one year are annualized.

For accounts holding mutual funds, ENV is currently using month end dividend rates for daily accrual funds. On the last day of the month, the dividend rate is multiplied by the number of shares held in an account. The dollar amount will be applied to the account performance. As a result of not applying a daily accrual, your performance could be higher or lower if the shares were not held for the entire month. This estimated amount is reversed out on the 1st day of the next month when the actual custodian dollar amount is received. This amount received from the custodian will be applied to your account performance. This does not affect your actual dividend payment.

Activity and Performance Summary Footnotes

¹ Net Investment is the total value of contributions and withdrawals (excluding unsupervised assets) made by the client since the inception date of the account. This includes Misc. Expenses and Accrued Income received from the custodian.

² "Beginning Value": the account's value at the beginning of each period; "Contributions": the value of deposits from the client into the account for each period; "Withdrawals": withdrawals from the account for each period; "Capital Appreciation": all realized and unrealized changes in market value during the period; "Dividends": the amount of dividends received from stocks or mutual funds for each period; "Interest": the amount of interest received for each period; "Advisory Fees": the amount of advisory fees charged to the account for each period. Income Received is computed from the dividends and interests of the supervised assets only.

³ These figures compare the Time Weighted Rate of Return (TWRR) of your account with a benchmark index. "Mgr Bchmk" refers to a blend composed of 60% MSCI All Country World Index World(USD)(TRN), 40% Bloomberg U.S. Aggregate Bond TR (6/29/2008 - 1/1/2018), 38% Russell 1000 TR, 26% Bloomberg Intermediate U.S. Government/Credit TR, 14% BNYM Dev Mkt Classic ADR Ind, 8% Bloomberg Gbl Agg Ex USD TR Hdg USD, 4% BNYM Emg Mkt Classic ADR Ind, 4% S&P Small Cap 600 TR, 4% Bloomberg 1-3 Govt/Credit Bond TR, 2% BOFAML 3-Month U.S. T-Bill TR (1/2/2018 to date). "Mgr Bchmk" is a customized benchmark that segments specific blended benchmarks into different time periods (as noted herein) to reflect the corresponding changes in your portfolio's investment strategy over time. The intent of these segmented benchmarks is to seek to provide a more accurate comparison to which returns can be evaluated effectively. A benchmark is an unmanaged index, and its performance does not include any advisory fees, transaction costs or other charges that may be incurred in connection with your investments and/or managed accounts listed. Any benchmark whose return is shown for comparison purposes may include different holdings, a different number of holdings, and a different degree of investment in individual securities, industries or economic sectors than the investments and/or investment accounts to which it is compared. Investors cannot invest directly into a benchmark or index. All portfolio returns for all periods are expressed in USD. All benchmark(s) returns reflect the same currency as the portfolio returns presented. Blended benchmarks are defaulted to rebalance monthly which means that Envestnet will asset weigh the benchmark component returns on a monthly basis using the beginning of the month weights. A daily rebalance option is also offered however may not be available in all cases due to data limitations from providers.

⁴ Time Weighted Rate of Return (TWRR) is calculated net of all fees. Time Weighted Rate of Return (TWRR) is used to compare your portfolio returns versus benchmark indices (such as S&P 500).

⁵ Returns for greater than one year are annualized.

For accounts holding mutual funds, ENV is currently using month end dividend rates for daily accrual funds. On the last day of the month, the dividend rate is multiplied by the number of shares held in an account. The dollar amount will be applied to the account performance. As a result of not applying a daily accrual, your performance could be higher or lower if the shares were not held for the entire month. This estimated amount is reversed out on the 1st day of the next month when the actual custodian dollar amount is received. This amount received from the custodian will be applied to your account performance. This does not affect your actual dividend payment.

³ These figures compare the Time Weighted Rate of Return (TWRR) of your account with a benchmark index. "Mgr Bchmk" refers to a blend composed of 54% Russell 1000 TR, 21% BNYM Dev Mkt Classic ADR Ind, 9% Bloomberg Intermediate U.S. Government/Credit TR, 6% BNYM Emg Mkt Classic ADR Ind, 5% S&P Small Cap 600 TR, 3% Bloomberg Gbl Agg Ex USD TR Hdg USD, 2% BOFAML 3-Month U.S. T-Bill TR (8/20/2020 to date). "Mgr Bchmk" is a customized benchmark that segments specific blended benchmarks into different time periods (as noted herein) to reflect the corresponding changes in your portfolio's investment strategy over time. The intent of these segmented benchmarks is to seek to provide a more accurate comparison to which returns can be evaluated effectively. A benchmark is an unmanaged index, and its performance does not include any advisory fees, transaction costs or other charges that may be incurred in connection with your investments and/or managed accounts listed. Any benchmark whose return is shown for comparison purposes may include different holdings, a different number of holdings, and a different degree of investment in individual securities, industries or economic sectors than the investments and/or investment accounts to which it is compared. Investors cannot invest directly into a benchmark or index. All portfolio returns for all periods are expressed in USD. All benchmark(s) returns reflect the same currency as the portfolio returns presented. Blended benchmarks are defaulted to rebalance monthly which means that Envestnet will asset weigh the benchmark component returns on a monthly basis using the beginning of the month weights. A daily rebalance option is also offered however may not be available in all cases due to data limitations from providers.

⁴ Time Weighted Rate of Return (TWRR) is calculated net of all fees. Time Weighted Rate of Return (TWRR) is used to compare your portfolio returns versus benchmark indices (such as S&P 500).

⁵ Returns for greater than one year are annualized.

For accounts holding mutual funds, ENV is currently using month end dividend rates for daily accrual funds. On the last day of the month, the dividend rate is multiplied by the number of shares held in an account. The dollar amount will be applied to the account performance. As a result of not applying a daily accrual, your performance could be higher or lower if the shares were not held for the entire month. This estimated amount is reversed out on the 1st day of the next month when the actual custodian dollar amount is received. This amount received from the custodian will be applied to your account performance. This does not affect your actual dividend payment.

Activity and Performance Summary Footnotes

¹ Net Investment is the total value of contributions and withdrawals (excluding unsupervised assets) made by the client since the inception date of the account. This includes Misc. Expenses and Accrued Income received from the custodian.

² "Beginning Value": the account's value at the beginning of each period; "Contributions": the value of deposits from the client into the account for each period; "Withdrawals": withdrawals from the account for each period; "Capital Appreciation": all realized and unrealized changes in market value during the period; "Dividends": the amount of dividends received from stocks or mutual funds for each period; "Interest": the amount of interest received for each period; "Advisory Fees": the amount of advisory fees charged to the account for each period. Income Received is computed from the dividends and interests of the supervised assets only.

³ These figures compare the Time Weighted Rate of Return (TWRR) of your account with a benchmark index. "Mgr Bchmk" refers to a blend composed of 38% Russell 1000 TR, 26% Bloomberg Intermediate U.S. Government/Credit TR, 14% BNYM Dev Mkt Classic ADR Ind, 8% Bloomberg Gbl Agg Ex USD TR Hdg USD, 4% BNYM Emg Mkt Classic ADR Ind, 4% S&P Small Cap 600 TR, 4% Bloomberg 1-3 Govt/Credit Bond TR, 2% BOFAML 3-Month U.S. T-Bill TR (10/19/2018 to date). "Mgr Bchmk" is a customized benchmark that segments specific blended benchmarks into different time periods (as noted herein) to reflect the corresponding changes in your portfolio's investment strategy over time. The intent of these segmented benchmarks is to seek to provide a more accurate comparison to which returns can be evaluated effectively. A benchmark is an unmanaged index, and its performance does not include any advisory fees, transaction costs or other charges that may be incurred in connection with your investments and/or managed accounts listed. Any benchmark whose return is shown for comparison purposes may include different holdings, a different number of holdings, and a different degree of investment in individual securities, industries or economic sectors than the investments and/or investment accounts to which it is compared. Investors cannot invest directly into a benchmark or index. All portfolio returns for all periods are expressed in USD. All benchmark(s) returns reflect the same currency as the portfolio returns presented. Blended benchmarks are defaulted to rebalance monthly which means that Envestnet will asset weigh the benchmark component returns on a monthly basis using the beginning of the month weights. Activity and Performance Summary Footnotes

¹ Net Investment is the total value of contributions and withdrawals (excluding unsupervised assets) made by the client since the inception date of the account. This includes Misc. Expenses and Accrued Income received from the custodian.

² "Beginning Value": the account's value at the beginning of each period; "Contributions": the value of deposits from the client into the account for each period; "Withdrawals": withdrawals from the account for each period; "Capital Appreciation": all realized and unrealized changes in market value during the period; "Dividends": the amount of dividends received from stocks or mutual funds for each period; "Interest": the amount of interest received for each period; "Advisory Fees": the amount of advisory fees charged to the account for each period. Income Received is computed from the dividends and interests of the supervised assets only.

³ Time Weighted Rate of Return (TWRR) is calculated net of all fees. Time Weighted Rate of Return (TWRR) is used to compare your portfolio returns versus benchmark indices (such as S&P 500).

⁴ Returns for greater than one year are annualized.

For accounts holding mutual funds, ENV is currently using month end dividend rates for daily accrual funds. On the last day of the month, the dividend rate is multiplied by the number of shares held in an account. The dollar amount will be applied to the account performance. As a result of not applying a daily accrual, your performance could be higher or lower if the shares were not held for the entire month. This estimated amount is reversed out on the 1st day of the next month when the actual custodian dollar amount is received. This amount received from the custodian will be applied to your account performance. This does not affect your actual dividend payment.
